

DCPS-Seminar SoSe 2024

fortnightly on Friday at 12:15 pm

PflaPhy, Königin-Luise-Str. 12-16

Gottlieb Haberlandt Lecture Hall

Date	Host	Speaker / Title
19.04.2024	Biochemistry of Plant-Microbe Interactions (Wiermer) / Microbiology (Remus-Emsermann)	Dr. Arezoo Rahimi, Leiden University: "Beneath the Soil: Unraveling the Secrets of Microbial Influence on Plant Growth and Development"
03.05.2024	Microbiology (Remus-Emsermann)	Prof. Dr. Lukas Schreiber, Universität Bonn: "Changes in wax composition but not amount enhance cuticular transpiration of poplar leaves"
17.05.2024	Systematic Botany and Geography of Plants (Borsch)	Dr. Walter Durka, Helmholtz-Zentrum für Umweltforschung Halle: "Nationwide assessment of genetic variation across multiple grassland plants: lessons learnt from the RegioDiv project"
31.05.2024	Biochemistry and Biophysics of Photosynthetic Organisms (Nürnberg)	Prof. Dr. Ulf Karsten, Universität Rostock: "Biological soil crusts - skin of mother Earth"
21.06.2024	Epigenetics of Plants (Schubert)	Dr. Hua Jiang, MPI of Molecular Plant Physiology, Golm: "Securing plant reproduction under climate change"
05.07.2024	Plant Physiology (Baier)	Prof. Dr. Peter Jahns, Heinrich Heine University Düsseldorf: "TBA"
12.07.2024	Biochemistry of Plant-Microbe Interactions (Wiermer)	Dr. Alexander Förderer, MPI of Molecular Plant Physiology, Golm: "Receptor structures at the plant-microbe interface for crop improvement"
