

# SEMINARS

## IN EVOLUTION & ECOLOGY

SS 2018 MONDAY 12:05 ZOOLOGY BUILDING, KÖNIGIN-LUISE-STR 1-3, LECTURE HALL

- 16.04**      **Detecting and interpreting signals of forest community change before and after major drought**  
Andrew Latimer (University of California, USA)
- 20.04**      **The origin of multicellular animals: A perspective from their closest unicellular relatives**  
(Friday 1pm!)  
Iñaki Ruiz-Trillo (The Institute of Evolutionary Biology, Barcelona, Spain)
- 23.04**      **Glycoalkaloid production in *Solanum dulcamara* – An important and genetically diverse driver of plant-herbivore interactions**  
Janny Peters (Radboud University, The Netherlands)
- 30.04**      **No seminar**
- 07.05**      **Extended co-evolutionary dynamics of major transitions: The role of platforms**  
Manfred Laubichler (Arizona State University, USA)
- 14.05**      **Novel and designed ecosystems**  
Eric Higgs (University of Victoria, Canada)
- 21.05**      **No seminar** Pfingsten / Whit Monday
- 28.05**      **Repeated evolution of camouflage in desert rodents**  
Zbyszek Boratynski (University of Porto, Portugal)
- 04.06**      **Land-use change effects on biodiversity in the Gran Chaco, a global deforestation hotspot**  
Tobias Kümmerle (HU Berlin)
- 11.06**      **TBA**
- 18.06**      **Tools for exploring poorly described environment fungal lineages**  
Christian Wurzbacher (Technical University Munich)
- 25.06**      **TBA** (keywords: conservation, population genetics, evolutionary biology)  
Philippe Helsen (Royal Zoological Society of Antwerp, Belgium)
