

2nd International Symposium of the DFG Priority Program 1132

Proteolysis in Prokaryotes: Protein Quality Control and Regulatory Principles

**Harnack-Haus, Berlin, Germany
April 20 - 23, 2005**

Program

The conference will cover the entire field from structure and biochemical mechanisms of complex chaperone/protease systems and molecular recognition of substrates to signal transduction and regulatory mechanisms that control degradation of specific proteins (e.g. key regulators) in the physiological context of stress responses, differentiation, cell cycle and virulence.

Format

The symposium will consist of invited lectures (30 min), short talks (20 min) and poster sessions.

Speakers

Y. Akiyama, T. Baker, B. Bukau, A. Burkovski, M. Ehrmann, C. Gross, M. Hecker, R. Hengge, U. Jenal, T. Langer, K. Liberek, A. Matouschek, M. Maurizi, F. Narberhaus, T. Ogura, A. Oppenheim, E. Ron, D. Rudner, H. Saibil, R. Sauer, S. Schaffer, W. Schumann, K. Turgay, W. Voos, D. Wolf.

Participants

The total number of participants will be around 100. This allows approximately 55 applicants to be accepted.

Conference site

www.harnackhaus-berlin.mpg.de

Applications

Applications should be submitted by e-mail to Regine Hengge (Rhenggea@zedat.fu-berlin.de). Please include: a short C.V., a list of max. 5 recent publications and a short statement of current research interests. If you would like to present a short talk or a poster, a one-page abstract should be included. Applications should be sent a.s.a.p., but no later than **January 31, 2005**. Applicants will then receive a registration form and further information. Registration should be accompanied by the payment of a Euro 280 conference fee.

Organisation

Organizing Committee:

Regine Hengge, Kürsad Turgay, Eberhard Klauk
Freie Universität Berlin (Germany).

Scientific Committee:

Bernd Bukau (ZMBH), Regine Hengge (FU Berlin), Thomas Langer (Universität Köln), Kürsad Turgay (FU Berlin)
