

Vortragsprogramm Anorganische Chemie Wintersemester 2023/2024

Jeweils Dienstag, 17:15 Uhr im Hörsaal Anorganik (Fabeckstr. 34-36). Eine Teerunde in V101e findet gegen 16:30 Uhr statt.

- 31.10.2023**
(Malischewski) *Supramolecular Assemblies Directed by Unconventional Interactions Involving Metals*
Prof. Dr. Antonio Frontera (Universitat de les Illes Balears)
- 28.11.2023**
(Thiele) *Solid State Research: Recent Observations that Challenge Current Understanding*
Prof. Dr. Dr. h.c. Martin Jansen (Max Planck Institute for Solid State Research)
- 16.1.2024**
(Müller) *Exploring Acridane-Derived Pincer Ligands: A Robust Framework for Main Group and Transition Metal Mediated Small Molecule Activation Reactions*
Dr. Josh Abbenseth (Humboldt-Universität Berlin)
- 30.1.2024**
(Riedel) N.N.
Prof. Dr. Javier Pérez-Ramírez (ETH Zürich)
- 13.2.2024**
(Thiele) *How to become an editor and what you can expect to do*
Dr. Christian Remenyi / Dr. Eliza Leusmann (Nachrichten aus der Chemie)
