

11. Kollegseminar WS 10/11 (27. Januar 2011)
(Freie Universität Berlin, Großer Hörsaal, Fabeckstr. 34/36, Dahlem)

14:00 (s.t.)-15:00 h

“Selective Direct Fluorination Strategies” (lecture series)

Prof. Dr. Graham Sandford (Durham University)

15:00-15:30 h

“Nanocomposite Materials Based on Sol-Gel Derived Magnesium Fluoride”

Dipl. Chem. Johannes Noack (Humboldt-Universität zu Berlin, AK Prof. Kemnitz)

15:30-16:00 h

“Low-Temperature Formation of Cubic $b\text{-PbF}_2$: Precursor-Based Synthesis and First-Principles Phase Stability Study”

Prof. Dr. Beate Paulus (Freie Universität Berlin)

16:00- 16:30 h Break (Coffee)

16:30-17:00 h

“Platinum Complexes in Superacidic Media”

M. Sc. Roland Friedemann (Freie Universität Berlin, AK Prof. Seppelt)

17:00-18:00 h

“Fluoro-Substituted Tetrapyrroles and Their Application in Photodynamic Therapy”

Dr. Arno Wiehe (Biolitec)
