

Dahlem NeuroSeminar Series

Winter/Spring2025

Thursdays 10:00am, Königin-Luise-Str. 3 - Main lecture hall

- Jan. 23 **Gerit Linneweber ,PhD**
Emmy Noether Group leader, FU Berlin
Beyond Nature and Nurture: Stochastic Origins of Animal Personality
- Jan. 30 **Bart Geurten, PhD**
Lecturer Zoology, University of Otago
AI Methods To Uncover Cognitive Biases in Flies
Host: Gerit Linneweber
- Feb. 06 **Randolf Menzel, PhD**
Emeritus Professor for Neurobiology, FU Berlin
Shared Intentions in Insect Society.
- Feb. 13 **Robin Hiesinger, PhD**
Professor for Neurobiology, FU Berlin
Adolescent Neuronal Behavior
- Feb. 20 **Mathias Wernet, PhD**
Professor for Neurobiology, FU Berlin
The known unknowns of neural circuits processing skylight cues
- Feb. 27 **Ilona Grunwald Kadow, PhD**
Professor for Physiology, Universität Bonn
How internal states shape behavior and decision-making
Host: Robin Hiesinger
- Mar. 20 **James Poulet, PhD**
Professor for Neuroscience, MDC Berlin
The neural circuits of thermal perception
Host: Robin Hiesinger

- Apr. 03 **Tobias Langenhan, PhD**
Professor for Biochemistry
How to transduce force into biochemical commands in the brain -
Mechanosensing by adhesion GPCRs
Host: Robin Hiesinger
- Apr. 10 **Gerd Kempermann, PhD**
Professor for Genomics of Regeneration, CRTD Dresden
Adult neurogenesis and the neurobiology of individuality
Host: Gerit Linneweber
- Apr. 24 **Basil el Jundi, PhD**
Professor for Physiology, NTNU Trondheim
Unraveling the behavioral and neural principles of spatial
orientation in Monarch butterflies
Host: Gerit Linneweber
