

SEMINARS

IN EVOLUTION & ECOLOGY

SS 2021 MONDAY 12:05 VIA WEBEX

- 12.04 **Peer Community In (PCI): A free recommendation process of preprints based on peer reviews**
Thomas Guillemaud & Denis Bourguet (PCI)
- 19.04 No seminar
- 26.04 **Genome evolution of the cockroach endosymbiont, *Blattabacterium cuenoti***
Thomas Bourguignon (Okinawa Institute of Science and Technology, Japan)
- 03.05 **Eco-evolutionary dynamics in freshwater systems - towards a multi-species perspective**
Lynn Govaert (IGB, Berlin)
- 10.05 **The pathobiome and symbiotic continuum: new frameworks for symbiont-host interactions and pathogenesis**
David Bass (Centre for Environment Fisheries and Aquaculture Science, UK)
- 17.05 **Rainforest futures**
Robert Ewers (Imperial College London)
- 24.05 No seminar
- 31.05 **Gene flow and adaptation to elevation in frogs**
Josh Van Buskirk (University of Zürich)
- 07.06 **How harmless and solitary locusts turn into gregarious pests**
Jochen Pflüger (Freie Universität Berlin)
- 14.06 **Fighting aliens: Dealing with invasive plant species during restoration**
Florencia Yannelli (Freie Universität Berlin)
- 21.06 **Tracking the history of species and ecosystems with environmental DNA**
Laura Epp (Universität Konstanz)
- 28.06* **Migration, microbes and medication in the monarch butterfly**
Jacobus de Roode (Emory University, US) * The seminar will start at 17:00
- 05.07** **Rainforest futures**
Robert Ewers (Imperial College London) ** The seminar will be presented on Zoom. The link will be circulated on mailing lists, or please contact [sophie.armitage \[at\] fu-berlin \[dot\] de](mailto:sophie.armitage@fu-berlin.de)
- 12.07* **Dynamics, feedback, and transient antibiotic resistance in single cells**
Mary Dunlop (Boston University, US) * The seminar will start at 17:00
