

Distribution of Methods Modules for the Winter Semester 2020/21

Last updated: 26th October 2020

- ± The following students are entitled to participate:
 - Master students of Biochemistry
 - Bachelor students of Biochemistry after successful completion of all basic lab courses
 - Diploma students of Biochemie after successful completion of the pre-diploma

Please note:

- ± Participation in some modules requires the prior attendance of lectures or other courses.
- ± Some methods modules require participation in preliminary meetings which may be long before the start of the lab course. Please check whether this applies in the individual case.
- ± When you are unable to attend a methods module, please inform the lecturer(s) immediately.
- ± Methods modules with a German title from the Institute of Biology are in German language.

Special note for Master students:

- ± Two modules from two different fields have to be completed in the Methods section. The third methods module can be chosen from the third field or, if available, from affine fields.
- ± When the Methods section is completed, further methods modules count as electives.
- ± A methods module consists of a seminar and a lab course. Usually, there are more spots available in a seminar than in the corresponding lab course. If a seminar is attended only, it counts as a course in the Elective section (Special aspects of the corresponding field).
- ± You find a table of methods modules and corresponding fields on the last page of this file.
