

# Delivery of full solvent canisters

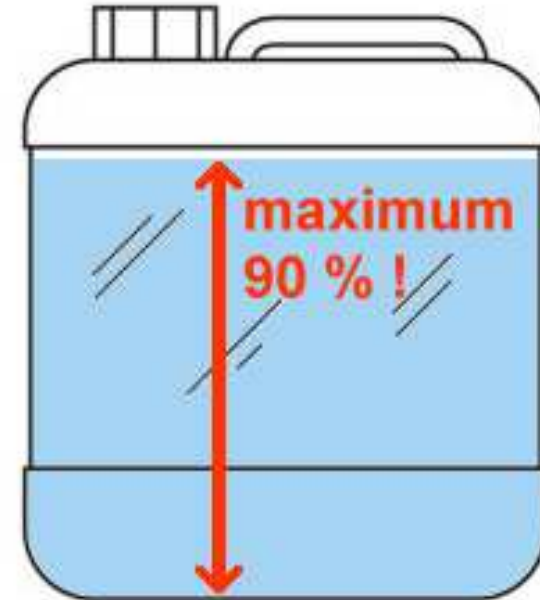

## Only fill up to a maximum of 90 %!

Collected solvent waste with different chemical components can react with each other.

This requires a spread volume of 10 % to be on the safe side.

Before submitting make sure that the contents has reacted.

Only hand in canisters that are tightly closed, overall tight, clean on the outside and correctly labeled.

**Never put halogenated solvents in the collection canisters halogen-free waste!**
