2nd MPS WORLD SUMMIT

JUNE 26-30, 2023

Hotel Berlin Central District | Berlin, Germany

© Hesperos

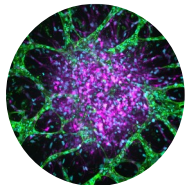

Multi-organ-on-chip Body on chip
3D Cell Culture Instrumentation
MICROFLUIDICS iPS cells Organ-on-chip
Advanced cellular models
MICROPHYSIOLOGICAL SYSTEMS
3D Bioprinting Cell-based assays Spheroids
ORGANOIDS 3D Organ Human-on-chip
Tissue slices In vitro systems

The **MPS World Summit**, with the support of more than forty organizations, invites you to join us at the second Microphysiological Systems World Summit in Berlin.

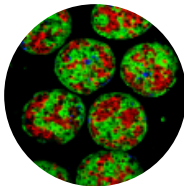

The 2022 inaugural summit in New Orleans brought together a global audience and established the first steps in creating a roadmap for MPS technologies, and also served to officially establish the International MPS Society (IMPSS).

The 2023 meeting will begin on Monday, June 26, 2023 with satellite events and the start of a week of scientific programs. For those interested in hands-on-training, we will also host an educational workshop with up to 12 presenters and 4 sessions.

Abstract submission and travel award applications are now open. For more information, please visit our website at or scan the QR code.
