SEMINARS
IN EVOLUTION & ECOLOGY

WS 2026/2027 MONDAYS **12:05**

19.10 **Collective organisation in a social insect and plant-pollinator ecology as consumer economics**
Anna Dornhaus (The University of Arizona)

26.10 **Interdisciplinary perspectives on the evolution of microbe virulence**
Mathias Franz (Freie Universität Berlin)

02.11 **Frameworks for conservation science**
Thomas Evans (Freie Universität Berlin)

09.11 **Genomic routes to conservation**
Camila Mazzoni (Leibniz Institute for Zoo and Wildlife Research / Freie Universität Berlin)

16.11 **Developmental plasticity in ants**
Eva Schultner (University of Regensburg)

23.11 **Maintaining the balance of power in animal societies**
Danai Papageorgiou (Humboldt University Berlin)

30.11 **Evolution of immune investment strategy**
Robert Peuß (University of Münster)

07.12 **Resistance evolution during treatment: what can we learn from mathematical modelling?**
Christin Nyhoegen (Freie Universität Berlin)

14.12 **TBA**
TBA

11.01 **Diversity and evolution of sex determination**
Kora Klein (Leibniz Institute of Freshwater Ecology and Inland Fisheries Berlin)

18.01 **One hundred years of Lotka-Volterra models**
Stefano Allesina (The University of Chicago)

25.01 **On the edge of speciation: hybridization in amphibian species**
Isolde van Riemsdijk (Lund University and Copenhagen University)

01.02 *Winter holidays – no seminar*

08.02 **TBA**
TBA

SEMINARS WILL BE HELD IN THE LECTURE HALL IN THE ZOOLOGY BUILDING, KÖNIGIN-LUISE-STR 1-3.
